CAREER SUMMARY

Digital Transformation professional with 3+ years of experience in data analysis, business analysis, and process automation. Experienced in translating business needs into data-driven solutions by gathering requirements, defining KPIs with stakeholders, and supporting decision-making through Power BI dashboards built using data modeling, DAX, and Power Query. Worked with multiple data sources to extract, clean, and structure data, enabling consistent and reliable performance tracking. Led automation initiatives that reduced manual reporting effort by up to 90% and developed Python-based solutions that improved process efficiency, reducing job development time by 85%. Skilled in Power BI, SQL, and Python, with a strong focus on process improvement, stakeholder collaboration, and driving data-driven transformation within organizations.

WORK EXPERIENCE

Digital Performance & Quality Intern

Dec 2025 - Jun 2026

Danone | Hoofddorp, The Netherlands

- Automated monthly performance reporting, reducing manual processing time by approximately 90% and eliminating reporting errors.
- Developed Power BI dashboards using Power Query (M) and DAX, including data modeling to structure datasets and incorporating slicers, tooltips and drill-through features for detailed co-manufacturer performance analysis.
- Defined and implemented KPIs with business stakeholders and cross-functional teams to monitor co-manufacturer performance, compliance, and quality metrics, enabling early issue detection and data-driven decision-making.
- Extracted, cleaned, and transformed data using automated queries, improving data accuracy and reducing manual data handling.
- Identified and validated data sources across multiple systems through stakeholder interviews and data flow mapping, ensuring alignment with reporting requirements.
- Analyzed existing data flows and reporting processes to identify inefficiencies and implement automation opportunities.
- Created structured walkthroughs and instructional videos to support dashboard adoption.

Digital Transformation Analyst Intern

Apr 2025 - Jun 2025

GoodHabitZ B.V | Eindhoven, The Netherlands

- Built a Power BI dashboard integrated with Jira to enable real-time visibility into workload, sprint planning, and team capacity.
- Applied DBW (Design Based Working) principles to develop and iterate user centric lo-fi, mid-fi, and hi-fi prototypes based on stakeholder feedback.
- Collaborated with cross-functional teams to analyze digital processes and identify improvement areas.
- Conducted stakeholder interviews to gather user and functional requirements for user-centric system design.
- Performed Stakeholder Analysis to clarify team roles, needs, and expectations for dashboard alignment.
- Conducted Socio-Technical Analysis to align the solution with both organizational and technical contexts.
- Executed a Digital Readiness Assessment to assess infrastructure, reporting tool use, and Jira integration.
- Led user walkthroughs and feedback sessions to validate prototype usability and workflow fit.

IT Business Analyst

Feb 2022 - Jul 2024

Tata Consultancy Services (TCS) | India

- Interacted closely with business stakeholders to understand and analyze their requirements.
- Proposed optimal technical and business solutions based on stakeholder needs.
- Identified and addressed inefficiencies in the job development process.
- Developed a Python script to automate a significant portion of the job development process. Resulted in an 85% reduction in time and elimination of manual errors, early delivery and deployment to the client during the transition phase.
- Worked collaboratively with clients, technicians, and managerial staff to gather comprehensive requirements.
- Monitored deliverables and ensured timely completion of tasks.
- Conducted analysis, generated insights, dashboards and visualization of gathered information for process and job development using Power BI and Smartsheet.
- Utilized SQL and Linux to log into databases and servers, extracting account information for analysis.
- Regularly reported issues, progress, and other important information to stakeholders.

Professional Achievements

- Star of the Month (TCS)
- Best Team Award (TCS)

Associate Product Manager (Bootcamp)

Jan 2023 - Mar 2023

Tikdin | France (Remote)

- Created Product Vision for Tikdin.
- Actively tracked the North Star Metric using Amplitude.
- Performed User Research Analysis by reaching out to users, conducting user interviews and understanding their pain points.
- Analyzed Product Stickiness metrics using Amplitude.
- Performed RICE Analysis as part of product prioritization.
- Drafted Product Requirement Document focusing on framing the feature as per the pain points identified using RICE Analysis and user interviews.

EDUCATION

Masters Digital Technology Engineering

Aug 2024 - Jul 2026

Fontys University of Applied Sciences

Bachelor of Engineering (Mechanical Engineering)

Aug 2016 - Apr 2020

Savitribai Phule Pune University

CERTIFICATIONS

Google Certified Associate Cloud Engineer

Google Cloud Platform

Microsoft Certified Power Platform Developer Associate

Microsoft

Diploma in Software Testing

Nov 2021 - Apr 2022

SKILLS

Data Visualization | Data Insights | Power BI | SQL | Python Automation | UAT (User Acceptance Testing) | Requirement Gathering | Excel | Cloud | SDLC (Software Development Life Cycle) | Agile Methodology | Analytical Skills | Project Management | Stakeholder Management | Strategic Planning | Design Thinking | Systems Thinking | Communication | Leadership | Adaptability | Problem Solving | Teamwork | Creativity | AI (Artificial Intelligence)
